## The facts will help

- Osteoarthritis occurs when there is a breakdown of joint tissues including the smooth cartilage that covers the ends of bones.
- The risk of getting osteoarthritis goes up if:
  - the person is female;
  - someone else in the family has it;
  - the joint is loaded abnormally and/or used improperly;
  - the person is over their ideal body weight;
  - the joint is injured.
- Young and old people get osteoarthritis, but as you get older your chance of getting it increases.
- Knees, hips and joints in the hands are most commonly affected by osteoarthritis.
- The most common symptoms of osteoarthritis are pain and stiffness, but can also include swelling.
- The best proven ways to treat osteoarthritis are through physical activity and getting to a person's ideal body weight.
- Osteoarthritis is a serious chronic condition that increases the risk of:
  - Diabetes;
  - Heart disease;
  - Stroke;
  - High blood pressure.

## Common Symptoms

Pain and/or stiffness in or around a joint lasting for more than two weeks

Pain in joints, especially in hands and feet

Reduced strength and mobility in a joint or joints

# Information for your doctor

## What to share

### Rate your pain

### Describe how your pain impacts your quality of life:

- Physical activity
- Sleep
- Mental Health (like mood or depression)
- Relationships
- Worklife

## Qs for your healthcare provider

Here is a list of suggested questions to ask your healthcare providers about osteoarthritis:

- Q Is my joint pain caused by osteoarthritis?
- Q What can I do to help my symptoms of pain and stiffness?
- Q What ways are proven to reduce my pain symptoms?
- Q Do I have to take medicine or are there other things I can do to help myself?
- Q How long will it take for the prescribed medication(s) to take effect?
- Q What can I do to help prevent further joint damage?
- Q Should I exercise if I have joint pain? How much and how often?
- Q What are reliable websites with more patient information on arthritis?

Which joints are hurting?

# Your joint examination

## What to expect

Hip Rotation

Lateral movement

Hip Flexion

Knee to chest

Knee Range of Motion

Heel to buttock

Joint Strength

Sit and stand

## Hand function and strength

Squeeze

Wrist

Grip

Pinch

Other tests beyond the physical examination are not usually required and will only be ordered if there is a concern

# Your self-care checklist

Suggestions to help you get the most out of your self-care plan.

| Physical Activity  |   | Modify Activities   |   |
|--|---|---|---|
| Walking, water based exercise and cycling are "joint friendly"   |    | Protect or support joints when necessary by using splints or braces for affected joints       |    |
| Perform aerobic, range of motion and muscle strengthening exercises to help keep joints well supported, flexible and aligned |    | Modify your home or change how you do things when joints are painful                          |    |
| Diet   |   | Medications   |   |
| Eat healthy balanced portions from all food groups, and avoid "fast food" high in saturated fats                             |  | Follow your medication routine as closely as possible to best control osteoarthritis symptoms |  |
